

# HAGERSTOWN PLANT

## FACT SHEET

### WHO WE ARE

The Hagerstown cement plant is located in Maryland and was constructed in 1903. The plant supplies cement to Maryland, Virginia, West Virginia, Ohio, Pennsylvania and Washington DC. Hagerstown Plant produces the highest quality oil well cements in the market.

- 100 employees
- 600,000 metric tons of cement produced annually
- Safety-first culture, the importance of safe behaviors and a safety mindset is constantly emphasized as the highest priority, with the goal of zero harm to people
- Community-focused approach, supporting local organizations and events, including being the main supporter of the Antietam Conococheague Watershed Alliance (ACWA) Rubbish Roundup on the Antietam

### ENVIRONMENTAL COMMITMENT

The Hagerstown facility utilizes tires as part of the plant Alternative Fuels program. Other environmental sustainability initiatives include:

- Reducing NOx by more than 60% and SO2 by approximately 50%
- A modernization project which resulted in a significant reduction on Particulate Matter (PM) of more than 75%
- Constructing a new kiln line to meet new NESHAP emission limits
- Opening an adjacent solar field to provide clean, renewable energy for facility operations

### BUILDING PROGRESS FOR PEOPLE AND PLANET

As part of Holcim US, we play an essential role in accelerating our world's transition to a net zero and inclusive future. Together, we all stand for the following:

- Making cities greener
- Empowering society with smarter infrastructure
- Becoming a net zero company
- Improving living standards for all
- Building more with less
